Minutes of January 21, 2009

Special Meeting

9:00 a.m.

10500 Kelly Street, Mendocino

Special Meeting was called to order at 9:00 a.m. at the Wastewater Treatment Plant.

Present: Directors Kraynek, Dill and O'Brien. Directors Ball and Schwartz were not present. Also present were District Superintendent Mike Kelley. Secretary Mitchell was not present.

The Board of Directors held a Special Meeting to observe the demonstration of a sewer jetter. Steve Gauch of U S Jetting demonstrated a trailer mounted Model 4018 high pressure jetter and jetter accessories.

The Water Resources Control Board requires implementation of a Sanitary Sewer Management Plan, which includes developing procedures and having the necessary equipment to prevent or contain a sanitary sewer overflow (SSO). In the future if there is an SSO, the jetter would be used to clear the blocked sewer main, and the vacuum pump that comes with the unit would be used to recover any wastewater discharged to the surface due to the blockage.

MCCSD currently uses a contractor to high pressure wash the collection system. District staff plans to use the trailer jetter to clean a portion of the collection system to reduce annual sewer cleaning costs.

A trailer mounted jetter will be stored in the existing space available at the treatment plant. U S Jetting will train District personnel on the safe operation of the jetter.

The meeting adjourned.

Respectfully submitted,

Michael Kelley
District Superintendent
